I am a Web Developer who strives to combine the art of programming with the art of design. Coming from creative backgrounds (Filmmaking, Journalism and Architecture) I am passionate about making things and witnessing ideas transition into tangible forms. I enjoy creating unique and engaging web applications with an elegant UI and I treat minimalism as my personal style and philosophy. I constantly seek new challenges that will leverage both my analytical and creative abilities.

PROJECTS

PERSONAL PORTFOLIO

🔗 Deployed Project

- My portfolio website created with React.js. Currently being in progress it features the use of HTML5, CSS3, SCSS, React.js, GSAP and a little bit of a wild imagination :)

BRAIN FLIX

🔗 Front-End   🔗 Back-End

- Prototype for a video streaming platform, YouTube clone.
- Technologies used: React, Node, Express, BEM, Rest API, Postman, SCSS, npm packages.

IN STOCK

🔗 Front-End   🔗 Back-End

- Full-Stack React Inventory Management System built with an agile team of 3 Developers using JIRA, React, Express, MySQL, Knex, BEM, SCSS, Postman, npm packages.

CLARITY

🔗 Deployed Project

- Web-based mental health app built in 2 weeks as a capstone project.
- Allows users to identify, keep track and journal their emotions and mood changes.
- Technologies used: React, Express, Chart.js., SCSS, BEM, JSON, Postman.
- Currently working on adding User Authentication and OpenAI API to generate to-do lists within the app as well as adapting the app for mobile using React Native.

SKILLS

HTML5, CSS3, SCSS, Bootstrap, BEM, JavaScript, React.js, TypeScript, Greensock, UI/UX Design, Webflow, Figma, Jira, Git & GitHub, Netlify, Agile Development, Responsive Web Design, React Native, Node.js, Express.js, DOM API, Web APIs, User Authentication, OAuth, Jest, MySQL, Heroku, Terminal Shell, Postman, Microsoft Office, Adobe Premiere Pro, Adobe Photoshop, Avid Media Composer, DaVinci Resolve, Sketch Up, Canva.

INDUSTRY PROJECT

🔗 Front-End & Back-End

- Achieved first place in the 24-hour hackathon tech challenge organized by Visier.
- Simplified the company's website through the implementation of a customizable dashboard tailored to individual users' business needs.
- Done with React with an agile team of Web Developers, UX Designers and Data Scientists.

BANDSITE

🔗 Deployed Project

- Fully responsive functional website for a band.
- Done with Vanilla JavaScript, SCSS, REST API, Postman.
